PROFESSIONAL SUMMARY

Frontend Developer specializing in React, Next.js (full stack), and TypeScript, with proven experience delivering production-ready dashboards and scalable UI systems. Skilled in REST API integration, component-based architecture, and performance optimization. Currently completing a B.Sc. in Information Technology at Al-Rashid Private University (2026).

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js (full stack), React Router
Styling	Tailwind CSS, Bootstrap
State & Data	Context API, Zustand, Axios, i18next, REST APIs
Tooling	Vite, Git, GitHub
Backend Basics	Laravel, Node.js

WORK EXPERIENCE

Frontend Developer Intern

Sep 2025 – Present

Vica Solution

- Architected and delivered a full admin dashboard from scratch, covering authentication, role-based routing, and dynamic data management — serving as the primary UI layer for the company's web platform.
- Built 15+ reusable React + TypeScript components (forms, tables, modals) shared across multiple pages, significantly reducing duplication and improving UI consistency.
- Integrated complex REST APIs using Axios, handling async state, error boundaries, and loading states across the entire application.
- Applied Next.js for server-side rendering on key pages, improving initial load performance and SEO readiness.
- Collaborated with a backend team on API contract design and resolved cross-origin (CORS) configuration issues in a Vite + Laravel environment.

PROJECTS

Admin Dashboard

React, TypeScript, Vite, React Router, Axios, REST API, Laravel

Production-grade admin dashboard featuring role-based access control, full CRUD operations, and dynamic data tables connected to a live REST API. Engineered with reusable typed components and optimized rendering to handle large data sets smoothly.

Trippy — Travel Booking Interface

React, React Router, Vite, Tailwind CSS

Responsive travel booking UI with dynamic trip listings, smooth client-side routing, and fully reusable card and filter components. Focused on clean visual design and seamless UX across all screen sizes.

Syrian Real Estate Platform

React, TypeScript, Vite, Tailwind CSS, i18next, OpenStreetMap, Axios

Full-featured real estate web platform with bilingual support (Arabic/English), OpenStreetMap property maps, localStorage-based favourites, and a REST API-integrated property listing system. Leading frontend development in a team of three.
